PROFESSIONAL EXPERIENCE

***POWER PLATFORM DEVELOPER & M365 SOLUTION DESIGNER /
VODÁRENSKÁ AKCIOVÁ SPOLEČNOST A.S. / 6/2018 – PRESENT***

- Since 2022, specializing in cloud services, integration, and process automation within Microsoft 365:
 - ✓ End-to-End Solution Design & Development (A to Z): Ability to independently deliver projects from initial analysis and data layer design (SharePoint/Dataverse) to user interface architecture (Power Apps) and automated backend workflows (Power Automate).
 - ✓ Testing, Deployment & Maintenance: Ensuring internal alpha testing, leading beta testing with end-users, followed by presentations and user training. Responsible for continuous management, application debugging, and rapid hotfix deployment.
 - ✓ Data Processing & Integration: Advanced automated data extraction from invoices (PDF to XML/ISDOC formats) using AI tools and integrating external third-party services (e.g., ALICE or the ARES registry) via REST APIs. Efficient querying over structured data using XPath functions.

- ✓ License Cost Optimization: Designing solution architectures with an emphasis on the effective use of Connection References and service accounts to completely eliminate the need for premium licenses for end-users.
- ✓ Power BI: Creating analytical reports and business data visualizations to support management decision-making.
- Full corporate infrastructure, software, and hardware management:
 - ✓ Microsoft Entra ID / Active Directory: Access and permission control, user onboarding/offboarding, and comprehensive Group Policy (GPO) management (automating network drive and printer mapping based on office locations).
 - ✓ Network Administration & Configuration: Advanced management of Ubiquiti hardware environments (Wi-Fi, CloudKey, Switches), Edge-Core switches, and basic configuration of MikroTik routers. Implementation of VLANs, trunking, and port aggregation.
 - ✓ Network Services: Management, maintenance, and configuration of DHCP servers.
 - ✓ End-User Device Management: IT support for user workstations (PC/Laptop), managed print solutions, and mobile device fleet deployment via MDM.

SHAREPOINT & POWER PLATFORM SPECIALIST (FREELANCE) /

7/2024 – PRESENT

Specialist in SharePoint Online and Microsoft Power Platform, focusing on business process automation and custom internal tool development within Microsoft 365.

QUALITY CONTROL INSPECTOR / ZETOR KOVÁRNA S.R.O. /

1/2016 – 5/2018

- ✓ Laboratory Operations: Software metrology – data entry into databases, building data catalogs, maintaining measuring instrument records, and setting up calibration schedules.
- ✓ Contourograph: Creating inspection program references, generating compliance protocols, data evaluation, archiving, and exporting data into PDF format.
- ✓ Inspection: Quality control of turned and machined components.

KEY PROJECTS & ROLES

- ✓ **Project Manager – Attendance System Pilot (ANeT):** Successfully implemented and managed the pilot phase for the Brno-venkov division.
- ✓ **Company-Wide Attendance System Rollout:** Led the deployment of the attendance solution across 6 other corporate divisions within VAS.
- ✓ **System Administrator:** Main administrator of the ANeT attendance system and its supplementary functional modules.

TRAINING & CERTIFICATIONS

- **2025**
 - First Aid Course (Certificate)
 - PostgreSQL
 - Python
 - Copilot a AI agents
 - Cybersecurity
 - Foundations of 3D Printing
- **2024**
 - Cybersecurity
- **2022**
 - Cybersecurity (Certificate)
 - Microsoft 365 Core Applications (Foundational Training)
- **2020**
 - HTML Fundamentals (Certificate)
- **2018**
 - Networking Fundamentals (Certificate)

EDUCATION

TECHNICAL HIGH SCHOOL OF ELECTRICAL ENGINEERING | 2006 – 2010

High School Graduation Exam (Maturita). First two years focused on general electrical engineering, followed by a specialized curriculum in System Automation.

LANGUAGES

- Czech: Native speaker
- English: Pre-Intermediate / Intermediate (A2 – B1). Passive proficiency focused on reading technical documentation, writing clean code, and highly effective daily interaction with AI tools.

TECHNICAL SKILLS

- IT Infrastructure: Active Directory, Group Policy (GPO), DHCP, Print Spooler, Network & Switch Management
- M365 & Low-Code: Power Apps, Power Automate, SharePoint Online, Power BI, Low-Code Development
- Data & Languages: XML, JSON, ISDOC, XPath, Python, PostgreSQL, VBA, HTML
- Hardware & Automation: Arduino, Raspberry Pi, CNC Engineering (Milling, Laser Engraving)
